

Appln. No. 09/847,843
Amendment dated September 12, 2005
Reply to Office Action of June 14, 2005

Amendments to the Claims:

Please amend claim 1 as follows. The following listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

Claim 1 (Currently Amended). A document reading device comprising:

a reading unit for reading an image of a document;

a document size detector for detecting a size of the

5 document; and

a controller for controlling said reading unit to read the image of the document in a read size corresponding to the document size confirmed from a detection result of said document size detector;

10 wherein said controller includes a user interface for inputting and outputting various information, and read size specifying means for requesting designation of a document size via said user interface when the document size is not confirmable from a detection result of the document size detector and

15 specifying the read size corresponding to the document size which
is designated via said user interface according to the request,

wherein said reading unit includes a document table for
supporting a single document placed thereon and a cover capable
of being opened and closed, and said read size specifying means
20 is constructed such that the document size designated via said
user interface is confirmed in a state where said cover is
closed, and the document size is maintained until said cover is
opened,

wherein the document reading device further comprises a
25 document feeder for feeding a document other than the document on
said document table,

wherein said reading unit is capable of reading an image of
the other document fed by the document feeder while maintaining
the document on the document table, and

30 wherein said read size specifying means ~~includes a memory~~
~~and~~ is configured such that the read size for the document fed by
said document feeder is independently specified from the read
size for the document on said document table ~~by maintaining to~~
maintain the document size designated via said user interface for
35 the document on the document table when said reading unit is
reading the image of the other document fed by the document
